It's no secret that Filipino designer Kenneth Cobonpue is one of *HC's* favourite people. We love his beautiful use of sustainable materials such as plant fibres and rattan, and how he brilliantly combines the Asian penchant for curves and emotion with a distinctly modern aesthetic. We hear that the *Pigalle Easy Armchair* is one of Cobonpue's personal favourites and we have to admit that it's fast becoming one of ours as well. It's made of strands of abaca rope tied to a well-engineered frame of light steel. The result is an extremely curvy chair that appears exceedingly light and airy.
